Dear friends,
the catalog that you hold in your hands
provides information on products, brands
and companies created and operated in
the Kaliningrad region.

Today on the territory of region has been
created the entire infrastructure for the
effective implementation of investment
projects. It includes modern industrial are-
as, industrial parks, unique privileges of
the Special Economic Zone and customs
preferences, various federal and regional
measures to support business.

Each resident of the Kaliningrad Special
Economic Zone receives guarantee at the
legislative level that the business environ-

ment would be unchanged. The regio-
nal government provides informational
and resource support for protection
business

interests and reducing administrative
barriers.

Today hundreds of enterprises, thou-
sands of companies and individual
entrepreneurs produce competitive
products that adequately represent our
region on the territory of russian and
world markets.

And we are glad to introduce them to
your attention!

Woodland tenant in the Kaliningrad region. Manufacturer and exporter of low-grade wood products and high-technology production

Since 2010 LLC Baltic Forest Company has been the largest and most conscientious woodland tenant in the Kaliningrad region in the Chernyakhovsky and Pravdinsky districts. LLC Baltic Forest Company uses the rented woodland for timber harvesting and carrying out a package of works to protect, restore and improve forest health and productivity. In addition the company is one of the largest investors in the Region's forestry complex and an exporter of low-grade wood products and high-tech production. Since 2018 company has been a resident of the Special Economic Zone of the Kaliningrad region.

FUEL CHIPS
particles obtained by grinding wood raw materials intended for burning - energy purposes

Production address: Russia, Polesky District, Saranskoye, Kaliningradskaya street, 1A

www.balticforest.com

FURNITURE PANEL
A furniture panel made of solid wood is ecologically clean material which is ideal for the manufacture of high-quality furniture, wooden stairs, wall panels, doors, steps, window sills, and for use in construction and finishing works.

THE WINDOW BEAM
Window beam is a modern environmentally friendly material for the production of window blocks.

FUEL CHIPS
particles obtained by grinding wood raw materials intended for burning - for energy purposes.

Producer of wood pellets by converting wood wastes

VERA's production capacities are located in the Kaliningrad region on the in-house production area. The Company owns buildings which houses production shops and warehouses of finished products. The company also owns a storage area for raw materials (in the open air) and its own transport base. Clean production is based on the modern equipment using advanced woodworking technologies. All of the Company's products meet the highest quality standards and are certified by the international ENplus certificate.

WOOD PELLETS

Pellets conforming to the norms commonly used in Europe (DIN 51731 or O-Norm M-7135) have less than 10% water content, are uniform in density (higher than 1 ton per cubic meter, thus it sinks in water) (bulk density about 0.6-0.7 ton per cubic meter), have good structural strength, and low dust and ash content.

238210, Russia, Kaliningrad region, Gvardeisky district, Gvardeisk, Stantsionnaya street, 3A

www.bepatrade.com

Fuel briquette manufacturer

Company has its own production site in the north-east of the Kaliningrad region. The fuel briquette production line is equipped with new equipment and consists of crushing, preparation, drying, briquetting and packaging sections. The main source of raw materials is the cleaning of abandoned agricultural land from tree and shrub vegetation. Fuel briquettes are produced by pressing sawdust without the use of artificial binders. The main advantages of fuel briquettes: increased efficiency, high burning time, minimal formation of ash, smoke and carbon dioxide.

FUEL BRIQUETTE NESTRO TYPE

The shape is cylindrical. Diameter - 90 mm. Length - standard 250 mm (any length is possible on request). Weight with the length of 250 mm - 2 kg. Density - 1.5 g / cc. Humidity - up to 12%. Ash content - up to 3%. The calorific value is 14.9 kJ / kg.

238730, Russia, Kaliningrad region, Krasnoznamensk, Sovetskaya street, 37A

<https://eko3.biz>

Largest producer of glued scantlings in the North West region, it also produces panels, scantlings, sawlogs and sawn wood products

It is a company with a full processing cycle of sawlogs and lumber, including roundwood sorting, unique flow-line technique of Quarter sawing and drying, computer-aided optimization of lumber and gluing of ready-made products for delivery to the markets of Europe and Japan.

Our branch in the city of Bratsk in Irkutsk region has two lines of lumber sawing: a high-performance line for small wood sawing to supply sawn goods produced to the markets of the Middle East and Asia.

WINDOW THREE LAYERED GLUED SCANTLINGS.
 Classification of scantlings:
 Category 1 (DKD),
 Category 2 (DKK),
 Category 3 (KKK);

ОПТИМ-КРАН

Manufacturer of crane equipment (bridge and gantry cranes)

The company has its own production base - plant which is located in the suburb of Kaliningrad, Svetly. The plant designs, manufactures and supplies its products both in Russia and abroad. The plant is equipped with the most high-tech equipment which fully meets customer requirements, high product quality and the production of cranes for operation in difficult operating conditions, at ambient temperatures from -50°C to +80°C for various climatic regions (from tropical to far north regions) and in numerous industries.

GENERAL INDUSTRIAL

GENERAL INDUSTRIAL

OJSC «Electric welding» - manufacturer of welding equipment, materials and means of automation of welding processes

Plant with 60 years of history is full-cycle enterprise with its own procurement, tooling, transformer and welding-assembly sections. It provides continuous monitoring of product quality from procurement to production.

The enterprise has its own lines for the production of wires (solid cross-section, powder seamless and for high alloy steels), chemical and testing laboratory, and design department.

The territory of the plant is 6.8 hectares and the total area of the workshops is about 15,000 square meters.

More than 16,000 units of finished products have been

manufactured annually: from small welding machines and materials to automated complexes used in mechanical engineering and heavy industry.

AUTOMATIC WELDING TRACTORS

236034, Russia, Kaliningrad region, Kaliningrad, Dzerzhinskogo street, 136A

www.ao-esva.com

INSTALLATIONS FOR WELDING PIPES
Payload up to 1000 kg

WELDING AND ASSEMBLY TABLES
With various coating options: steel, cast iron, aluminum.

WELDING RECTIFIERS
single and multipoint.

SLEWING TABLES
Carrying capacity from 3 to 25 tones

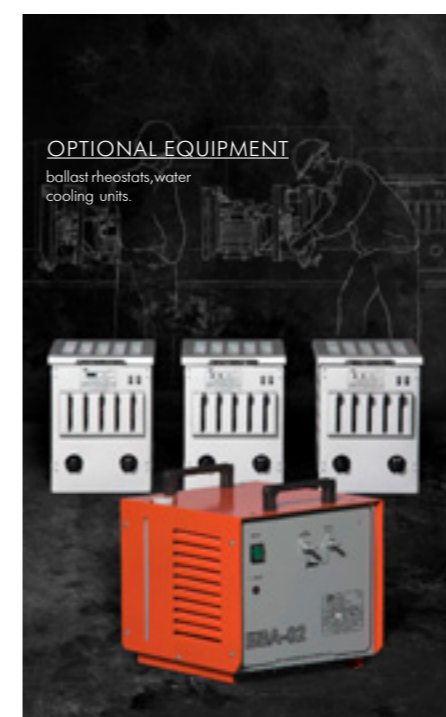

WELDING WIRE
- solid section ESG-3 (AWS A5.18: ER70S-6)
- powder seamless (AWS A5.20: E71T)
- powder for stainless steels

WELDING MANIPULATORS
Carrying capacity from 150 to 10 000 kg.

SUPPORTING ROLLER ROTATORS

- with smooth adjustment
- with step adjustment
- self-adjusting (various loading capacity)

OPTIONAL EQUIPMENT
ballast rheostats, water cooling units.

MACHINES OF CONTACT SPOT WELDING
with radial and forward stroke of the electrode.

WELDING COLUMNS
It is optionally equipped with welding equipment and a tracking system.

The manufacturer of polyethylene terephthalate (PET) under the Ecopet brand designed for the production of PET bottles and cans, containers and food packaging as well as various products for technical and household use

Since May 2007 ECOJET has been a resident of special economic zone OF the Kaliningrad region.

According to the list of systemic organizations in the Kaliningrad region ECOJET is the leader of the chemical industry.

ECOJET makes use of the latest state-of-art MTR (Melt-to-Resin) innovative technology from Uhde Inventa Fisher GmbH (Germany) which ensures production of the highest quality products.

The ECOJET plant is the first in Europe and the fourth in the

world performing operations by means of the MTR technology

Production of stainless pipes and fittings

Our company is one of the leaders in the production and supply of stainless steel pipes in Russia and CIS countries. The products produced by our factory are stainless steel pipes with different types of surface treatment such as polished and ground met all high requirements. Our factory has proved to be a reliable and trustworthy supplier. Our partners are offered high-quality certified pipe products that are fully compliant with GOSTs (All-Union State Standards) and other world standards. The factory produces high quality welded pipes. Over the years of hard work we have passed a long way and earned high reputation with our products. And today with the experience gained and good traditions of reliability, trust

and honesty that have developed with our partners during the years of successful cooperation, we can look in future with confidence.

[STAINLESS STEEL TUBES](#)

Are long-length uniform hollow section (lengthwise) products (round, oval, square/rectangular).

Russia, Kaliningrad region, Kaliningrad, Pravaya Naberezhnaya, 22A

www.baltinox.ru

Manufacturer of the steel sheet with polymer

The company has its own production capacities – factory, which is located in the Kaliningrad. The plant is equipped with a state-of-the-art imported line for metal painting, computerized industrial process control system which contributes to the consistent high quality of products.

COILD STEEL

With polymer paint-and-lacquer coating of between 0.2 mm to 1.2 mm thick.

236034, Russia, Kaliningrad,
Dzerzhinskogo street, 168F

WINDOW COMPOSITE PROFILE

Manufacturer of composite materials for construction

Scientific and production company that produces innovative translucent systems. Glazing with the AeroCarbon window system allows you to create any shape and size of windows including panoramic glazing (floor to ceiling) which is now one of the most prestigious types of glazing in premium and business class houses. Made in compliance with all the requirements of the technology, it retains heat indoors on the one hand and on the another protects from overheating in sunny days.

DOOR COMPOSITE PROFILE

238200, Russia, Kaliningrad
region, Znamensk, Melnichnaya
street, 30

www.aerocarbon.io

Manufacturer of autoclaved aerated concrete blocks and high quality dry building mixtures

The company has its own production base - plant which is located in an ecologically clean area of the Kaliningrad region. The plant was built in 2014 and is equipped with the most modern imported equipment WEHRHAHN, with computerized process control system that ensures consistently high quality product. It has its own laboratory certified by the Federal State Institution "State Regional Center for Standardization, Metrology and Testing in the Kaliningrad Region", which monitors the quality of raw materials and finished products at each stage of production. A well-established level of organization of production processes allows

us to guarantee compliance with environmental standards both in current production and in future operation.

Weight is 25 kg.

Baltspetsmash Limited Liability Company (Baltspetsmash LLC) is developer and manufacturer of trailers of various purposes

The company has its own design office and production site located in Gusev, Kaliningrad region. The production is equipped with imported equipment for cutting, bending, welding, painting and other technological tools used in the manufacture of trailed equipment.

MODEL 94531
Semi-trailer for transporting pigs, sheep and cattle with the number of loading floors from 1 to 4

26040, Russia, Kaliningrad, Proletarskaya street, 66 - 6

trailer.baltspetsmash.ru

MODEL 8774
Trailers for transportation of animals in a train with a car

MODEL 945320
Universal batcher for filling semi-trailer for transporting live birds in containers

THE CONTAINER SEMI-TRAILER
intended for transportation of 20 to 40 foot containers

MODEL 9445-0000010
Telescopic-sliding semi-trailer with loading platform height of 850 mm, possible extension length up to 30 meters, and lifting capacity up to 68 tons

TRUNK SEMI-TRAILERS

MODEL 94533-0000010
Heavy-duty semi-trailers low loader designed for the transport of road equipment weighing up to 100 tons and extending the loading area up to 36 meters

Grunwald LLC is Russian machine-building factory, manufacturer of modern semi-trailers and tipper superstructures for chassis

Company has modern production complex consisting of 2 industrial sites in the Kaliningrad region and service station in Sheremetyevo, Moscow. Since its founding in 2007 to the present day company has been bringing advanced technologies and international experience to the Russian market. Grunwald company cooperates only with leading European and world manufacturers of materials and components. Thanks to the systematic approach the distinguishing features of the Grunwald brand are high build quality, first-class paintwork and exceptional reliability.

DROP-FRAME UNIVERSAL SEMI-TRAILER CONTAINER.

It is designed for efficient carriage of all standard container types – 1x20', 2x20', 1x30', 1x40', 1x40'HC.

238312, Russia, Kaliningrad region, Gurievsky district, Pribrezhnoye, Kaliningradskoye shosse, 1

www.grunwald.ru

20 FT. TANK-CONTAINER

Purpose-built semi trailer-container for transporting 20 ft. tank-containers

DROP-FRAME UNIVERSAL SEMI-TRAILER CONTAINER.

It is designed for efficient carriage of all standard container types – 1x20', 2x20', 1x30', 1x40', 1x40'HC.

A CONTAINER VEHICLE WITH A HYDRAULIC HOIST

It combines the advantages of a tipper truck and a container vehicle. The high strength characteristics of a 40-foot container and a large payload (67.5 m3) enables it to transport the widest range of cargo, and the tipping unloading system of the container opens up additional opportunities

A TIPPER SEMI-TRAILER WITH A «HALF-PIPE» BODY

The body space – 31 cubic meters. The tipper semi-trailer, which has been developed in collaboration with specialists of the German design bureau, demonstrates high consumer qualities

A TIPPER SEMI-TRAILER WITH A «HALF-PIPE» BODY MADE OF HARDOX STEEL

The body space – 24 cubic meters. It is the best combination of weight and strength characteristics. It is designed for cost-effective transportation of high-density bulk goods

A TIPPER SEMI-TRAILER WITH A «HALF-PIPE» BODY

The body space – 22 cubic meters. It is a compact and light steel semi-trailer, embodying the idea of cargo transportations of the future

OGSB
Oil & Gas Systems Baltia

THE PRODUCTION UNIT functionally unites the meter run unit and the oil quality measuring unit.

The OGSB specializes in the engineering design, manufacture and supply of the complete sets of equipment for refining, gas and petrochemical industries

The OGSB plant is located in the industrial zone of Kaliningrad and it occupies an area of 2.5 hectares.

The production space is divided into separate areas allowing products to be manufactured in stages as scheduled and without delay and in compliance with health and safety requirements. The team of certified welding specialists has the right to work in compliance with Russian requirements (technical regulations and industrial safety regulations) as well as in compliance with international standards (ASME, EN).

To guarantee the quality of the products manufactured in

compliance with the requirements (as contracted) quality control laboratory has been set up. The laboratory is made up of certified specialists in visual quality control and dimension inspection, X-raying, ultrasonic testing, magnetic particle testing, and liquid penetrant testing. The certified specialists are granted the right to conduct non-destructive testing in compliance with Russian requirements; they have also got the necessary training and have the right to carry out this kind of testing in accordance with the requirements of the EN and the ASME and to make the required conclusion reports.

236039, Russia, Kaliningrad, Portovaya street, 41

www.ogsb.ru

THE QUALITY MEASUREMENT UNITS

are designed for automated measurements of physical and chemical properties of oil quality in the course of measuring operations and recording the results of measurements with accuracy.

MECHANICAL DISPLACEMENT METER

provers with a capacity of 100 m³/h to 4000 m³/h and ANSI pressure classes (150-900). Mechanical displacement meter provers are designed to verify various flow transducers by repeated moving of a certain amount of liquid.

STANDARD SYSTEMS

are designed for primary and periodic calibration of the mechanical displacement meter provers with a capacity of 100 m³/h to 4000 m³/h.

THE SYSTEMS FOR MEASURING THE QUANTITY AND QUALITY OF OIL

The systems for measuring the quantity and quality of oil depend on a particular technical task and may include.

WELDED SINGLE BASKET FILTERS

Standard welded filters can be used at pressures of up to 20 Mpa, with the size of the connected nozzles ranging from 25 to 500 mm. Inlet and outlet nozzles can be manufactured for welded, threaded or flanged connection in compliance with the requirements of Russian and foreign standards.

MEASURING TANKS

They are used for calibration and verification of flow transducers and mechanical displacement meter provers of the 1st category. Measuring tanks are manufactured according to TU-4213-006-95715144-2010.

Manufacturer of shoes

ZapadBaltObuv Group of Companies is manufacturer and distributor of working and special shoes and knitted gloves. Company has been operating for more than 19 years and during this time more than 3,500,000 pairs of shoes have been produced. We work with companies from all regions of Russia as well as from the CIS countries. More than 3000 companies are our regular customers. Our products comply with GOSTs and have all the necessary certificates of conformity and test reports.

BOOTS ART.4208

Safety shoes with two-layer PU/PU (polyurethane) soles; Top - genuine leather 1.6-1.8mm thick with embossing; Injection method of mounting the sole, $t = -20\text{ }^{\circ}\text{C} \sim +85\text{ }^{\circ}\text{C}$, oil-benzo-acid-alkali resistant; Resistant to aggressive environment and oil products; Heel shock absorber; Blind valve preventing the penetration of dirt, moisture and dust.

Russia, Kaliningrad, Sovietsky avenue, 191

www.zapadbaltobuv.ru

LOW SHOES ART.3216

Safety shoes on a single-layer PU (polyurethane)sole; Top - genuine leather 1.6-1.8mm thick with embossing; Injection method of mounting the sole, $t = -20\text{ }^{\circ}\text{C} \sim +85\text{ }^{\circ}\text{C}$, oil-benzo-acid-alkali resistant; Resistant to aggressive environment and oil products; Heel shock absorber;

SANDALS ART.3220

Safety shoes on a single-layer PU (polyurethane)sole; Top - genuine leather 1.6-1.8 mm thick with embossing; Injection method of mounting the sole, $t = -20\text{ }^{\circ}\text{C} \sim +85\text{ }^{\circ}\text{C}$, oil-benzo-acid-alkali resistant; Resistant to aggressive environment and oil products; Heel shock absorber; Soft edging for additional support and protection of the legs; Can be equipped with a metal toe cap, metal insole.

BOOTS ART.4218

Safety shoes with two-layer PU/PU (polyurethane) soles; Top - genuine leather 1.6-1.8 mm thick with embossing; Injection method of mounting the sole, $t = -20\text{ }^{\circ}\text{C} \sim +85\text{ }^{\circ}\text{C}$, oil-benzo-acid-alkali resistant; Resistant to aggressive environment and oil products.

KNITTED GLOVES

4 threads, 7.5 class knitting. Length 250-260 mm. An elastic band is inserted in the cuffs. Double overlock. Cuffs are overlocked with colored polyester thread. Composition: knitwear - 70% cotton, 30% polyester. Protective properties: against abrasion, from general industrial pollution. Appointment: general production work.

BOOTS WITH HIGH BERETS ART.3219

Safety shoes with two-layer PU/PU (polyurethane)soles; Top - genuine leather 1.6-1.8mm thick with embossing; Injection method of mounting the sole, $t = -20\text{ }^{\circ}\text{C} \sim +85\text{ }^{\circ}\text{C}$, oil-benzo-acid-alkali resistant; Resistant to aggressive environment and oil products; Heel shock absorber; Blind valve preventing the penetration of dirt, moisture and dust;

TOSCANO'S END-TO-END COLLECTION

Comfortable ergonomic tables, functional shelving system, beds, lamps are ideal both for teenagers and students. This collection also features a new attractive Toscano Soft bed with a soft headboard that matches with Toscano's bedroom modules in Cappuccino/Craft Oak.

THE DUBAI COLLECTION

In new color – grey antracite. This Dubai color version has become a real hit of sales in European networks, with which InterDesign has been cooperating for many years.

MEDEA COLLECTION

Creamy color range, matte lacquer finish, delicate golden ornament on the furniture facades and elegant decorative parts imitating carved items. The soft element in the headboard of the bed has a pearl sheen to it and is surrounded by a frame of exquisite shape. The bed can be equipped with a lifting mechanism if desired.

THE VINTAGE LIVING ROOM

dazzles with its luxury and silkscreen drawings with an effect of diamond powder. It is made of high-quality materials and has a coating applied with the help of a special lacquering technology. Special lighting will help to focus on individual items for the purpose of interior designing.

Premium wallpaper production

LLC "Wallpaper manufactory "Prima Italiana" is the first Italian wallpaper factory in Russia. The founder of the factory is Industrie Emiliana Parati SpAthe (Italy) which has been operating for more than 40 years.

November 26, 2013 – the factory produced the first roll of wallpaper over a full production cycle – rotogravure printing and hot embossing.

Nowadays the factory occupies an area of 4 hectares, the size of production space and warehouse is 7 thousand square meters, office and technical premises – 1.2 thousand square meters. The company has installed high-tech production lines allowing to produce wallpapers of different sizes (53, 70 and 106 cm) and density (from 240-620 grams per

m2):
 Rotogravure Printing Line is from the Italian manufacturer ROTOMECC (BOBST)
 The hot embossing line is from the English manufacturer EMERSON and RENWICK.

MUNGER
MAÎTRE CHOCOLATIER

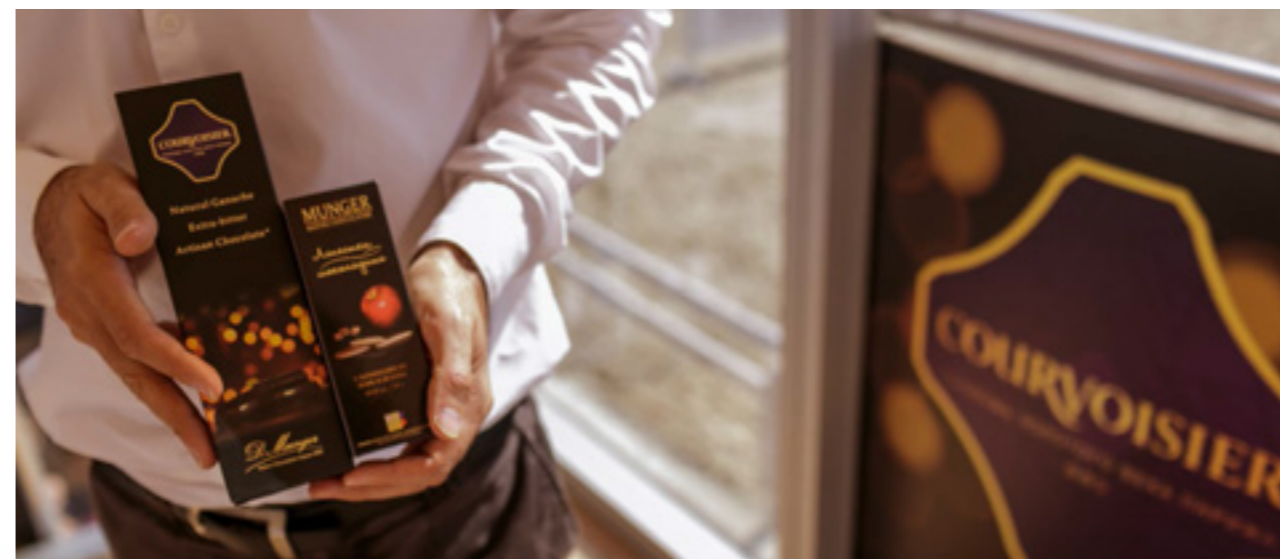

**Limited Liability Company
«Chocolatier D.Munger»**

Our company was found by Maotre Chocolatier Dave Munger, the winner of prestigious Salon du chocolate in Paris. Before he founded his own company in 2015, he was employed as Chief Technologist and Development Director by Russian market leaders for 13 years. He founded his own company to translate into candies and chocolates his own formula, to which he aspired as technologist, and which was unreal to realize in big commercial projects he worked before. It involves new methods, natural ingredients and a bit of magic. The chocolates produced by our company is made only from natural ingredients of artisan's quality. Composition of our products are an important component of our philosophy.

The best recipes were invented a very long time ago by the first artisans of chocolate. Our purpose is to adapt modern methods of production and to select packages which will give opportunity to deliver our natural candies fresh and safe to lovers of quality chocolate. Our company received the status of the Official Supplier of the Moscow Kremlin in 2019.

SOYBEAN OIL

is the product obtained in the process of soybean crushing, is used as a concentrated source of energy, fat-soluble vitamins, and essential fatty acids. Refined deodorized soybean oil is used for direct consumption in food and for the industrial production of food products, and can also be used for technical purposes. Degummed soybean oil is used for industrial processing (partial or complete refining of oil and / or its modification) for the purpose of producing edible oil or raw materials for food production, as well as for technical purposes.

RAPSEED OIL

being a rich source of essential polyunsaturated fatty acids, as is soybean oil, plays an important part in providing for human vital needs; it is used for prevention of cardiovascular diseases and ensures metabolism improvement. Crude rapeseed oil is used for further industrial processing, as well as for technical purposes.

SOY PROTEIN CONCENTRATE (SPC)

is a purified protein product containing up to 70% of crude protein. The product has been manufactured from food-grade soybean meal (White flake) released from soluble sugars in the process of alcohol extraction. The process allows obtaining the main protein fractions in a highly available form. Soy protein concentrate is intended for usage in feeding purposes by direct introduction into diets of all kinds of animals, poultry, aquaculture (with introduction rate of 5 - 20%), and for manufacturing compound feed products and pet food.

It is an excellent source of vegetable protein, fully compliant with the EPPE standard, thus meeting anti-cannibalism requirements. Low contents of ash and phosphorus, absence of biogenic amines and antigenic factors, high protein digestibility, full amino acid profile, low contents of antinutritional factors and long shelf-life allow using the concentrate as a calf milk replacer (CMR) for feeding calves, as a source of complete protein for feeding weaned piglets, or as an alternative to fishmeal.

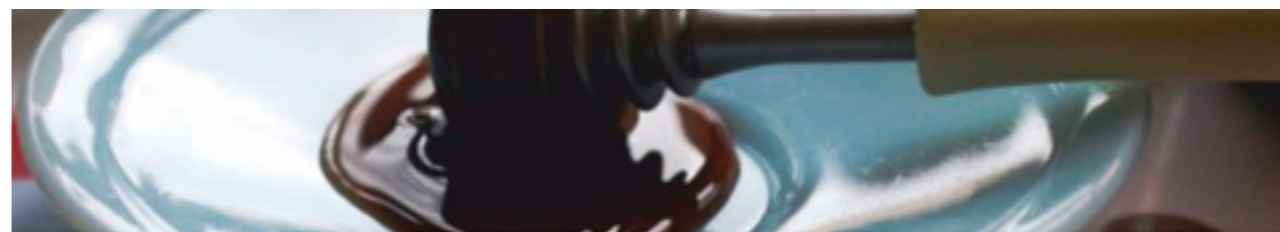

THE TOASTED SOYBEAN MEAL

is a product manufactured from soybeans after oil extraction under additional wet-and-heat treatment (toasting). The plant processes soybeans using direct extraction method with primary separation of seed hull. The plant can produce, in addition to the usual toasted soybean meal, soybean meal enriched with lipids. A significant amount of protein and energy in the meal allows you to make high-protein and high-energy diets without the use of expensive components of animal feeds. Soybean meal is widely used in the feeding of all types of farm animals, birds, fish.

THE TOASTED RAPSEED MEAL

is a product manufactured from rapeseeds after oil extraction. Rapeseed meal, as a valuable source of high-quality feed-grade protein and well balanced in amino acid composition, has high nutritional value and is widely used in cattle feeding. Biological value of rapeseed protein is about 86%.

SOY MOLASSES

is obtained as a by-product in the production of soy protein concentrate. Due to its high sugar content, molasses is used as a feed component in the production of feed for farm animals, as well as raw materials for the production of biofuels in the energy industry. Lecithins are food ingredients and being complex of natural plant phospholipids. It is used as a highly effective food supplement that improves the emulsifying, dispersing and other rheological properties of various food products, as well as an antioxidant.

Company «Vitako» is leading producer of processed cheese in the Kaliningrad region

The factory for the production of processed cheeses «Vitako» was opened in 2007 in the village of Chekhovo, Kaliningrad region. This is new production built upon the experience of leading Western manufacturers and equipped with modern equipment made in Italy and Germany. The company has its own raw material base - plant located in the ecologically clean area of the Kaliningrad region.

Having absorbed many years of experience in cheese making and combining it with the latest technologies, the «Vitako» company has been pleasing its customers with high-quality products for many years.

Processed cheese produced by the plant is made from natural

products: hard cheese, butter, cottage cheese, and milk powder.

Green ice cream producer

The company was founded in 2018.

The key message with which the founders developed the recipe was that the dessert should delight and prolong life. It's the first production in the world that produces ice cream without milk, sugar, preservatives and stabilizers but from raw plant components based on avocados with superfoods.

Three principles inherent in the product

- perfect ingredients;
- the benefit gives longevity;
- caring for the planet.

Ice cream is fit for everyone's demand: raw food eaters, vegans, diabetics, allergy sufferers.
